DETAILED ACTION

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

A review of Applicant's arguments in the Paper filed 10/19/2009 and a review of the instant claims has convinced the examiner that the claims are allowable over the applied prior art of record.

2. Regarding independent claim 7 and the dependent claims, the prior art fails to teach or suggest a leakproof package in the form of a rectangular parallelepiped of polypropylene suitable for rapid opening by tearing and for containing a semisolid product that is capable of being put in a semiliquid state, in particular cheese, the package being made up of two thin sheets, namely a first sheet cut out to an appropriate outline and shaped into a rectangular shell for receiving the product, and so as to present a pull corner for opening the package, and a second sheet cut to at least the dimensions of the bottom of the shell and for placing flat on the product with the side faces of the shell being folded down thereon, and heat-sealed, while leaving the pull corner free, and two tear strips disposed on and secured to the first sheet, so as to be entrained when the pull corner is pulled, wherein the pull corner is formed by a triangular projection formed on one of the sides of the first sheet cut out into an octagonal shape, and wherein the tear strips form a pointed U-shape with the tip thereof being situated in said triangular projection.

3. The closest prior art of FR 2.198.469 teaches a rectangular package for cheese with tear strips, however, fails to teach a package made of polypropylene, the package

Art Unit: 1794

made of two sheets with the second sheet being heat sealed, a pull corner that is free wherein the pull corner is formed by a triangular projection formed on one of the sides of the first sheet cut out into an octagonal shape, and wherein the tear strips form a pointed U-shape with the tip thereof being situated in said triangular projection

4. The secondary references of record do not teach or suggest the combined limitations not taught by FR 2.198.469.

5. Regarding independent claim 13 and the dependent claims, the prior art fails to teach or suggest a leakproof rectangular parallelepiped package comprising a first sheet of polypropylene in the shape of a rectangular shell having a bottom and four side walls for receiving a product; a pull corner formed by a triangular projection positioned on one of said side walls of said first sheet, said pull corner being adapted for opening the package; a second sheet of polypropylene having at least the dimensions of the bottom of the rectangular shell, said second sheet adapted to form a flat cover over said product; said four side walls being configured so that portions of said walls situated above the second sheet are folded down onto said second sheet and heat-sealed to form said leakproof rectangular parallelepiped package, while leaving the pull corner free; and two tear strips disposed on and secured to said first sheet and configured to form a pointed U-shape with a tip portion positioned in said triangular projection so that when the pull corner is grasped by a user, the two tear strips are also grasped by said user so as to be entrained when the pull corner is pulled to enable rapid opening of said package without encountering resistance of a fold, wherein said package is adapted to contain a semisolid product capable of being put in a semiliquid state.

Art Unit: 1794

6. The closest prior art of FR 2.198.469 teaches a rectangular package for cheese with tear strips, however, fails to teach a package comprising a first and second sheet made of polypropylene, with side walls that are heat sealed, a pull corner that is free with two tear strips disposed on and secured to said first sheet and configured to form a pointed U-shape with a tip portion positioned in said triangular projection so that when the pull corner is grasped by a user, the two tear strips are also grasped by said user so as to be entrained when the pull corner is pulled to enable rapid opening of said package without encountering resistance of a fold.

7. The secondary references of record do not teach or suggest the combined limitations not taught by FR 2.198.469.

8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
